# PREFACE

In the towns and districts of Rajasthan, a generation is finding its footing—not through chance, but through deliberate investment in its potential. **AU Ignite—Unlocking You**, a flagship program of **AU Foundation**, was established in 2018 on a belief both simple and transformative: that youth from underserved communities, when given the right guidance, are fully capable of shaping their own futures and contributing to the nation's growth.

The program skills youth between the ages of 18 and 30 from marginalized backgrounds individuals of considerable promise but limited access. Through 10 academies operating across 6 districts of the state, **AU Ignite** provides industry-relevant training across four sectors: Banking, Financial Services & Insurance; Healthcare; Tourism & Hospitality; and Information Technology & ITeS. The experience extends well beyond the classroom, encompassing industry visits, field-expert sessions, seminars, and hands-on assessments so that every graduate steps into the workforce not merely qualified, but genuinely prepared.

The curriculum, however, goes far beyond academic training. Soft skills such as communication, personality development, and financial literacy, among others are woven into the curriculum, ensuring that students carry with them not just technical competence but confidence and character.

The **AU Ignite Future Skills Training Centre**, established in September 2023, offers advanced skilling in MERN Stack, Java Full Stack with AI, and AI-Data Science, helping learners access opportunities with leading technology organizations across the country.

Placement drives and job fairs organized under the program have connected graduates with reputable employers in tier-2 and tier-3 cities, and 17 of them have secured job opportunities abroad. So far, forty-five especially abled trainees have been trained, and 33 have secured employment at respected organizations, each beginning a journey toward financial independence on their own terms.

The stories gathered in these pages belong to young people who arrived at **AU Ignite Future Skills Training centre** with potential and left with purpose. They are engineers of their own dignity and living proof that when opportunity meets determination, transformation follows.

This is their story, and it is only just beginning...
