Commenting on the performance, Mr. Sanjay Agarwal, MD & CEO, AU Small Finance Bank said, “The first quarter of FY24 saw improved macro environment with moderating inflation, narrowing current account deficit and rising foreign exchange reserves. The rural economy also continued to recover and the monsoon is likely to support the credit demand in rural and semi-urban areas. I am quite optimistic about the Indian economy and the banking sector looks poised for sustained period of growth.

Amidst this macro backdrop, AU SFB delivered another quarter of consistent performance across parameters with sustainable growth in our assets, deposits and profitability despite some impact on our margins due to deposit repricing and negative carry from excess liquidity buffers. The strong performance in this quarter is a testimony to our highly competent and empowered team and our business model which allows us to capture customer imagination, which in turn allows us to service our customers in an innovative manner.

Like every other quarter, we have continued to strive to improve the digital adoption by our customers and 45% of our new customer acquisition has been via digital products and channels like 'AU 0101', which is among the top-rated banking apps in the country.

Going forward, we will continue to focus on sustainable growth, aiming to improve our balance sheet size while penetrating deeper into rural India, where a significant unbanked population resides.”
